Our first Annual General Meeting (AGM) in Milan

2025

Milan, Italy

PollinERA's Annual General Meeting

Highlights from PollinERA's AGM in Milan

The PollinERA project held its 2025 Annual General Meeting (AGM) on 18–19 March in Milan, Italy, hosted by the Mario Negri Institute for Pharmacological Research. The two-day event brought together project partners and collaborators to reflect on recent developments, share ongoing research, and coordinate efforts for the months ahead.

Highlights from our training and webinars

First PollinERA training session: ERA regulatory perspectives

Last year, PollinERA held its first training session, titled "ERA Regulatory Perspectives", bringing together experts from key regulatory bodies and stakeholder organisations. The session was led by project partners James H. Williams (Aarhus University) and Noa Simón Delso (BeeLife).

PollinERA and PARC took part in SYBERAC's first webinar

PollinERA has partnered up with the EU-funded projects SYBERAC and PARC, sharing the common aim to meet the European Commission's Green Deal policy targets by advancing the Environmental Risk Assessment (ERA) methodologies.

Webinar showcasing PollinERA achievements

As part of PollinERA's first annual meeting on Tuesday, 18 March 2025, the project held an open session to present some of its achievements to date. Hybrid event focused on advancing Environmental Risk Assessment (ERA) for pollinators.

Two PollinERA open-access collections

FESMJ

The Food and Ecological Systems Modelling Journal (FESMJ) is an open-access journal sharing models, datasets and software on agriculture, food, bioeconomy, natural resources and environmental sciences. It covers subjects ranging from ecological processes and risk assessment to social-ecological systems and agricultural management. This is PollinERA's second open-access collection.

RIO

Research Ideas and Outcomes (RIO) journal, the first project open-access collection, serves as a central repository for researchers, policymakers, and practitioners, featuring reports, protocols, methodologies, and research papers, along with links to project publications in other journals.

***Watch now : PollinERA's
first two videos***

Introductory video

introductory video explains why pollinators are declining, how current pesticide risk assessments fall short, and how PollinERA's objectives work towards a One System Framework for better protection.

PollinERA 2024 highlights video

In the end of 2024, we reflected on a year full of dedication, collaboration, and progress for PollinERA. To celebrate these accomplishments, we've created a highlights video showcasing the project's most notable activities and progress over the past year.

New on PollinERA website

'Get Involved' section

PollinERA has launched a new Get Involved section on its website, where stakeholders can register to join open meetings, webinars, and events on pollinator risk assessment. Subscribers can also indicate their research interests, helping us foster collaboration and knowledge exchange.

Synergies with other pollination projects

PollinERA materials were displayed at the WildPosh Annual General Meeting in Paris, the AGRI4POL Kick-off Meeting in Brussels, and the VALOR Kick-off Meeting in Reading.

Policy horizon

The Horizon Europe project, BioAgora, is tasked to build the Science Service for Biodiversity, the scientific pillar of the European Commission's Knowledge Centre for Biodiversity.

Researchers and professionals can engage with BioAgora and the Science Service by:

- Contributing to policy requests for knowledge issued by the EC
- Participating in policy dialogues on key biodiversity topics
- Sharing knowledge together with BioAgora
- Joining a Knowledge Exchange Network based on your field of expertise

The BioAgora Knowledge Exchange Network on Pollination will mobilise actionable knowledge from the scientific and end-user community to link to EU policy objectives and improve the mainstreaming of pollinators and pollination across sectors.
